

In the field of personal protective equipment (PPE), the work gloves offered by BCL help improve the health and safety check of users, while increasing their productivity.

OUR MISSION: "Help make organizations more productive by protecting and optimizing the use of hands for their workers."

Since 1964

Female Lineman Glove Model 168-5/F All-Grain leather

A woman's hand is different from that of a man and has its own characteristics, especially in the proportions of the hand.

Our gloves for women were developed specifically to offer great comfort, excellent dexterity and all the protection required.

These gloves are made entirely of grain leather, cream-colored. Our glove is the female version of our model 168-5 for linemen. This glove is manufactured in Canada. It is made with high quality and very flexible leather glove, making it hypoallergenic (to help prevent dermatitis). It is resistant to water, oils and greases.

Highly visible, it has a fluorescent protective sleeve of 12.7 cm (5") with a reinforcement of protecting the arteries of the wrist.

For protection against the cold, we suggest inserting our ambidextrous knit thermal glove (model no.: 3C-K5P4) machine washable. The insertion of a liner is convenient and makes quicker drying of the leather glove when it is wet.

Maintenance:

To clean these gloves, we recommend washing with mild soap. Just rub them together under running water (like washing hands), and then let them dry at room temperature. In this way, the leather will regain its original flexibility (this is one of the characteristics of a quality leather glove).

Characteristics:

- American cut adjusted with elastic wrist
- Glove designed for women's hands
- 12,7 cm (5") fluorescent cuff
- All-Grain leather glove, cream coloured
- Grain leather, water and oil resistant
- Leather guard for arteries
- Dexterity, flexibility and strength
- Comfort and visibility
- Made in Canada

Available sizes : S, M and L
