

In the field of personal protective equipment (PPE), the work gloves offered by BCL help improve the health and safety check of users, while increasing their productivity.

OUR MISSION: "Help make organizations more productive by protecting and optimizing the use of hands for their workers."

Since 1964

Lineman Glove Model 168-5 All-Grain leather

This lineman glove, high-class, offers dexterity, comfort and protection. It is made of grain leather, cream coloured. It is very comfortable fit with its elastic wrist.

Highly visible, it has a fluorescent protective sleeve of 12.7 cm (5") with a reinforcement to protect the arteries of the wrist.

This glove is manufactured in Canada. It is made with high quality and very flexible leather glove, making it hypoallergenic (to help prevent dermatitis). It is resistant to water, oils and greases.

It is used with or without lining fabric (see the model 3C-K5P4) for shop work and outside.

For protection against the cold, we suggest inserting our ambidextrous knit thermal glove (model no.: 3C-K5P4) machine washable.

The insertion of a liner is convenient and makes quicker drying of the leather glove when it is wet.

Maintenance :

To clean these gloves, we recommend washing with mild soap. Just rub them together under running water (like washing hands), and then let them dry at room temperature. In this way, the leather will regain its original flexibility (this is one of the characteristics of a quality leather glove).

Characteristics:

- Slim fit with elastic wrist
- American cut – Made in Canada
- 12,7 cm (5'') fluorescent cuff
- All-Grain leather, cream colored
- Grain leather, water and oil resistant
- Leather guard for arteries
