

In the field of personal protective equipment (PPE), the work gloves offered by BCL help improve the health and safety check of users, while increasing their productivity.

OUR MISSION: "Help make organizations more productive by protecting and optimizing the use of hands for their workers."

Since 1964

Lined Glove Model 2190DW

All-Grain cowhide leather with **wristband**

Our lined glove is a classic for the harsh winters. Canadian-made with very soft leather glove, it is adjusted to the wrist with elastic wristband of 6.5 cm (2 ½").

This glove is comfortable and warm.

This glove is made with high quality and very flexible leather glove, making it hypoallergenic (to help prevent dermatitis).

It is resistant to water, oils and greases.

For heavy work where one executes a static work outdoors, or for work in freezers, the user will be protected from extreme cold and humidity.

Its synthetic fur lining, soft padded, similar to that of sheep, insulates from the cold.

Some of our customers use this glove to drive their snowmobiles or their ATVs in cold weather.

Maintenance:

To clean these gloves, we recommend washing with mild soap. Just rub them together under running water (like washing hands), and then let them dry at room temperature. In this way, the leather will regain its original flexibility (this is one of the characteristics of a quality leather glove).

Characteristics:

- Very soft leather glove
- Lined with imitation-fur
- All-Grain leather, water and oil resistant
- Cream coloured
- Elastic wrist of 6,5 cm (2 ½")
- Made in Canada
- Handling in cold and / or humid environments
