

In the field of personal protective equipment (PPE), the work gloves offered by BCL help improve the health and safety check of users, while increasing their productivity.

OUR MISSION: "Help make organizations more productive by protecting and optimizing the use of hands for their workers."

Since 1964

Women Welding Glove Model B462CS

Grain leather palm and split leather back

A woman's hand is different from that of a man and has its own characteristics, especially in the proportions of the hand.

Our gloves for women were developed specifically to offer great comfort, excellent dexterity and all the protection required.

These gloves are made of grain leather, cream-colored and split leather back.

This glove is manufactured in Canada. It is made with high quality and very flexible leather glove, making it hypoallergenic (to help prevent dermatitis).

It is resistant to water, oils and greases.

Very soft and comfortable fit with its elastic at the wrist, it has a split leather cuff of 7.6 cm (3"), with a reinforcement of protection for arteries of the wrist.

Maintenance:

To clean these gloves, we recommend washing with mild soap. Just rub them together under running water (like washing hands), and then let them dry at room temperature. In this way, the leather will regain its original flexibility (this is one of the characteristics of a quality leather glove).

Characteristics:

- Slim fit with elastic at the wrist
- Sewn with Kevlar®
- Split leather cuff of 7,6 cm (3")
- Grain leather palm, water and oil resistant
- Split leather back
- American cut
- Made in Canada
- Leather guard for arteries
- Heat resistant

Designed for:

- ❖ Welding
- ❖ Assembly

Available size: M
