European homologation

Metalfit is the result of the latest technology in dual filament inox knitting which gives the glove a cut level 5 CT according to EN ISO 13997.

This new standard, more representative compared to the actual risks, can offer Metalfit true resistance against strong cuts. Its reinforcement between the thumb and index improves the resistance in the very sensitive area and increases the life of the glove.

Cleaning: This glove is machine washable at regular cycle.

Sizes 7, 8, 9, 10 and 11

- ❖ Thin and precise handling of sharp parts with an excellent dexterity and abrasion resistance
- ❖ Handling of parts for automotive industries

HEAD OFFICE - PLANT
