

In the field of personal protective equipment (PPE), the work gloves offered by BCL help improve the health and safety check of users, while increasing their productivity.

OUR MISSION: "Help make organizations more productive by protecting and optimizing the use of hands for their workers."

Since 1964

Lineman Glove Model N168CS-5

Grain and split leather
with exterior seams

Designed for:

- ❖ Linemen
- ❖ Electricians

A glove for electrician or lineman made with comfortable leather. Seams are on the outside and protected by a ridge of leather.

This glove is manufactured in Canada. It is made with high quality and very flexible leather glove, making it hypoallergenic (to help prevent dermatitis).

It is resistant to water, oils and greases.

All grain leather palm and split leather back, it is very flexible and comfortable fit with its Elastic wrist.

It has a fluorescent cuff of 12.7 cm (5 ") with reinforcement for the protection of the arteries of the wrist.

For protection against the cold, we suggest inserting our ambidextrous knit thermal glove (model no.: 3C-K5P4) machine washable.

The insertion of a liner is convenient and makes quicker drying of the leather glove when it is wet.

Maintenance:

To clean these gloves, we recommend washing with mild soap. Just rub them together under running water (like washing hands), and then let them dry at room temperature. In this way, the leather will regain its original flexibility (this is one of the characteristics of a quality leather glove).

Characteristics:

- American cut adjusted with elastic wrist
- Outside seams protected by a ridge of leather
- Split leather back
- Grain leather palm, water and oil resistant
- Split leather cuff of 12,7 cm (5")
- Leather guard for arteries
- Handling in cold and / or humid environments
- Reduces fatigue
- Flexibility and comfort
- Made in Canada
