

In the field of personal protective equipment (PPE), the work gloves offered by BCL help improve the health and safety check of users, while increasing their productivity.

OUR MISSION: "Help make organizations more productive by protecting and optimizing the use of hands for their workers."

Since 1964

Handling - Precision Glove Model S001-4131 Nitrile Coated

Designed for multiple tasks:

- ❖ Mechanics
- ❖ General work
- ❖ Shop work
- ❖ Machinist
- ❖ Assembly
- ❖ Small parts handling
- ❖ Machining
- ❖ Automobile repair and maintenance

Our general Mechanic work glove is very light, comfortable and adjusted. Here is a Japanese designed ergonomic glove. This is a product of high technology and of high quality.

Well ventilated through the back, it keeps your hands dry since the coating (waterproof) on nylon tricot is found on the fingers and palm. A very popular glove among mechanics. It provides a high dexterity in dry, oily or wet conditions. Its textured surface composition allows having a good grip to manipulate small parts while keeping the worker hands dry.

Maintenance: To remove oil stains and grease, one has only to rub hands under running warm water. An emulsion, produced by the texture of the coating, is then created to dislodge dirt and increase the life of the glove.

Characteristics:

- Dexterity and flexibility
- Durability and comfort
- NBR nitrile coated palm and fingers
- Excellent grip in oily and wet conditions
- Elastic wrist - Gray nylon knit

Available sizes: S, M, L, XL and XXL
