

In the field of personal protective equipment (PPE), the work gloves offered by BCL help improve the health and safety check of users, while increasing their productivity.

OUR MISSION: "Help make organizations more productive by protecting and optimizing the use of hands for their workers."

Since 1964

Chemicals Resistant Glove

Model S020-4111

Grip - Impermeable

Designed for multiple tasks:

- ❖ Cleaning of parts
- ❖ Object manipulation in oily or chemical environments

Ceramic micro particles of this glove provide outstanding grip, even when handling parts in oil. The glove is antibacterial. It fights odour and protects the skin (hygienic). Abrasion resistant, it is ideal for cleaning mechanical parts or for handling them in corrosive substances. Here is a Japanese designed ergonomic glove. This is a product of high technology and of high quality.

Our nitrile glove is impermeable to many chemicals such as acetone, paint thinner, petroleum products and various acids (see the chart of chemicals). Abrasion resistant, it is ideal for cleaning mechanical parts or handling them in corrosive substances.

Maintenance:

To remove oil stains and grease, one has only to rub hands under running warm water. An emulsion, produced by the texture of the coating, is then created to dislodge dirt and increase the life of the glove

Characteristics:

- Coated ceramic micro particles with excellent grip on oily objects and providing a good resistance to abrasion
- Antibacterial to prevent odours and provide greater longevity to the glove
- Excellent for cleaning mechanical parts
- Excellent adhesion on wet or oily objects and high wear resistance
- Excellent flexibility, good dexterity and comfort
- Guaranteed protection against many chemicals
- Total length: 31 cm (12 ¼ inches)

Available sizes: M, L, XL and XXL
